At Eco Choice Windows and Doors we strive for your complete satisfaction everyday.

EnergiMAX^{slim}

Handles Our Extreme Canadian Climate Beautifully.

1. Streamlined Design: Lower profile sash maximizes glass surface area, offering a slimmer frame for increased light, expansive views, and improved visibility.

2. Enhanced Insulation: With a frame profile of 4 9/16" compared to the standard 3 1/4", our windows feature extra thermal pockets, boosting overall performance and energy efficiency.

3. Pure Material: Crafted from 100% Virgin UPVC (Unplasticized Poly Vinyl Chloride), our windows undergo a chemical process to remove impurities, resulting in the purest form of vinyl with vibrant, long-lasting colours

4. Improved Sound Insulation: The deeper frame profile enhances sound insulation, ensuring a quieter and more peaceful indoor environment.

5. Modern Aesthetics: Our updated profile offers a contemporary look compared to traditional beveled edge profiles, enhancing the visual appeal of your home.

6. Superior Performance: The ultimate insulating glass (IG) spacer, Super Spacer Premium Plus is a silicone warm-edge foam spacer with integrally incorporated desiccant, featuring a flexible matrix that works together with a vapor barrier and secondary sealant to keep moisture out and argon gas in. It offers a narrow, 1/4" sightline for high-quality aesthetics.

For Bigger Views.**

CASEMENT

Casement windows are hinged on one side and open outward like a door, typically operated by a crank or lever mechanism. This design allows for easy opening and closing with a simple turn of the handle. Casement windows provide excellent ventilation and a clear, unobstructed view when fully open.

FIXED

Picture windows and fixed casement windows are non-operational windows that enhance a space by offering clear, unobstructed views and abundant natural light. Fixed casement windows are often paired with operable casement windows to maintain a cohesive aesthetic.

- Dual and triple-pane glass options.
- Slimmer profile system.

ECO CHOICE Difference:

**Our Windows
Feature Triple
Sealed Vinyl
Window Frames**

SINGLE/ DOUBLE HUNG

Single and double-hung windows are two common types of windows found in many traditional homes. Single-hung windows have two sashes, with the bottom one being movable while the top one remains fixed. Double-hung windows, on the other hand, have two sashes that are both movable, this offers greater flexibility in ventilation and allows for easier cleaning since both sashes can be tilted inward for access to the exterior glass surfaces

SINGLE HUNG

- Canadian-made premium 100% lead-free UPVC virgin vinyl.
- Highest number of internal air chambers for maximum efficiency, sound reduction, and strength.
- Triple seal for maximum air and water tightness.
- Available in 3 1/4" or 4 9/16" frame systems.
- Dual and triple-pane glass options.
- Tilt or Lift system for easy cleaning.

DOUBLE HUNG

SINGLE/ DOUBLE SLIDER

Single slider windows feature one movable sash that slides horizontally along a track that can be opened for cleaning, while the other remains fixed. Double slider windows, on the other hand, have two movable sashes that slide horizontally, providing greater flexibility in ventilation and cleaning. Both sashes can be opened, allowing for improved airflow and versatility in directing breezes.

SINGLE SLIDER

- Canadian-made premium 100% lead-free UPVC virgin vinyl.
- Highest number of internal air chambers for maximum efficiency, sound reduction, and strength.
- Triple seal for maximum air and water tightness.
- Available in 3 1/4" or 4 9/16" frame systems.
- Dual and triple-pane glass options.
- Tilt or Lift system for easy cleaning

DOUBLE SLIDER

TILT & TURN

Tilt and turn windows typically consist of a single sash that can be opened in two different ways, controlled by the position of the handle. When the handle is turned 90 degrees, the window can be swung open like a casement window. Alternatively, when the handle is turned 180 degrees, the top of the window tilts inward, allowing for secure ventilation.

ECO CHOICE Tilt & Turn

One Window Two Openings

- Contemporary slim design
- 6-chamber profile system
- Steel reinforced 76mm frame
- Centre seal system for added thermal insulation
- Available in double or triple pane glass
- 3 levels of waterproofing for greater safety and thermal insulation
- Integrated anti-burglary protection thanks to the safetec inside system: the central reinforcement not only improves insulation, but also prevents break-ins.
- Safety glass

Corner Drive System

Eco Choice Casement Windows are available with the advanced Roto Corner Drive Multi-Point Locking System. This system delivers superior locking ability and a tight seal for increased security and improved insulation in all weather conditions.

The Roto Corner Drive enhances window security and performance by:

- Connecting additional lock bars to add additional lock points along top and hinge side of window.
- Providing an integrated lock point for consistent locking at the top corner of the window, regardless of window height. This is typically the weakest area in structural and air infiltration tests. The Roto Corner Drive allows for a snug fit and tight seal for consistent and solid performance year-round.
- Provides integrated lock point positioned 3" from frame corner for superior air/structural performance in smoother operation and reducing the effort required to open or close the window.

Triple Pane Glass

Compared to double-pane units, triple-pane windows allow less heat to escape, have less condensation, and are more soundproof. Makes sense. But another benefit of triple pane windows over double is that the extra pane allows for the utilization of additional Low-E coatings.

Low E Glass **CARDINAL** Glass Industries

Most advanced residential glass

Low Emissivity, or Low E, glass helps keep homes warmer in winter and cooler in the summer by increasing energy efficiency and reducing the transfer of heat or cold through the glass.

LoE-180™

When the weather turns frigid, Cardinal LoE-180™ glass is the perfect cold remedy. It keeps homes warmer and more comfortable by blocking heat loss to the outside and letting the sun's heat stream in. Cardinal LoE-180™ glass is designed for our Canadian climate; it offers the highest energy rating performance versus other glass manufacturers.

LoE-272™

Cardinal LoE-272™ glass delivers year-round comfort in all types of weather. In summer, it rejects the sun's heat and damaging UV rays. In winter, it reflects heat back into the room.

LoE-366™

Cardinal LoE 3-366® glass is the ultimate performance glass, delivering the ideal balance of solar control and high visibility. It provides the highest levels of year-round comfort and energy savings.

LoE-i89™

Introducing LoE-i89™, Cardinal new energy-saving 4th surface coated glass. Rather than absorbing internal heat, LoE-i89™ reflects it back into the room, making your living space feel warmer and more comfortable.

PEOPLE SAY THE NICEST THINGS.

1

We wanted the Tilt & Turn, we loved the quality of the product. We came across meeting Alan from Eco Choice. He had all the knowledge that could help us to achieve our goals. The Lift & Slide gave us the biggest bang for our buck – in a sense. We have no obstructions. The whole experience was amazing. The communication was amazing. Everything. It's like having a friend in our house.

2

I had several estimates but, Anthony who was the man that came out from Eco Choice to talk to me, really convinced me. He was so knowledgeable. So helpful. He told me all about the windows. He explained everything in great detail to me, which was great. Which was very helpful to me to make my decision. And I thought yes, this is the company that I want to go with.

3

So far so good. We had a great time with your gang. And they're really good. Bogdan and his Team have been terrific. They were on time. They work hard. They stayed late to get the upstairs done for us, so we can get our life back to normal. So we really appreciated that they got the job done, and we are every happy. It has been excellent.
